

# WHO WE ARE

AVIATION EXCESS INC started as AAA AERONAUTICAL EXCHANGE INC in 2000, in Orlando, Florida, giving part support to Airline operations; in 2006 we changed name and purpose, dedicating to buying slow, inoperative and excess inventories, obtaining cash flow and store space to commercial, corporate and helicopters operators. In 2007 we got into airlines liquidations and increased the in-house inventory, developed a strong support, and began manufacturing aircraft maintenance tools for AIRBUS, BOEING and ATR type of aircrafts. 12 years later we are still growing to give to our established and new customers our best value, "our honesty".

## GOING BEYOND TO SET NEW STANDARDS

- Providing superior value with unmatched safety
- Saving money from the first request
- Giving great value to the relationship
- Making possible the most important: availability, punctuality and cost.
- Continuing to grow to better assist your company's needs

Over one decade of service Aviation excess Has  
Earned the trust of Air carriers around the world.

# S e r v i c e s

Aviation Excess your single source!

- We buy your obsolete and overstock inventories with fair price

The aviation industry is exposed to constant changes and operators have realized that their left over inventory can become a profitable asset. Unfortunately the lack of experience in the sale of this type of material has made this a slow and inefficient process. We offer operators to convert their excess and inoperable inventory into cash flow, getting for their company extra budget to buy new equipment.

- Aircraft Parts Sales

We supply components and consumables for all kind of airplanes or helicopters in commercial, regional and corporative aviation. Also exchange units that are reparable as part of payment of your order and this way we avoid over costs in your order. Also offer the option of PMA Certified units to reduce the operational costs, and each component is supplied with their respective airworthiness certifications: FAA 8130-3 Certificate, Form JAA, Certificate from the OEM (Original Equipment Manufacturer), and our COFC (certificate of conformance).

- Ground Support & hand tools manufacturing.

We distribute and manufacture aircraft maintenance tools for aircrafts like AIRBUS, BOEING and ATR.

# QUALITY

## and Regulations Standards

AVIATION EXCESS, INC. only does business with countries approved by US department of state, unless otherwise noted this sale order may include munitions list items (MIL) or commerce controlled by US government. To get it out of the USA license may be necessary and approval to export from U.S. All units are shipped with the ECCN identification and end user screened.

We have the recourses to make fast and safe the sales process, establishing strict quality control and follow-up system of our units, which is required by the aviation industry been members of the Aviation suppliers association since 2003.

Our control process works along with Federal Aviation Administration regulations as well as the regulations of the country of destiny to guarantee that each unit is identified certified and well packed before delivering with the documentation required and total traceability to our final client.

Our analysts use the ATA model, along with the integrated data systems maintained by the technical logistics and commercial departments, combining information available of each aircraft. Also Working closely with the OEM or PMA to obtain the units fast we can provide the best lead time and Our pro-active team ensures an immediately availability of the units in the moment of a critical situation and The sitting time of the aircraft is reduced to the minimum, because we are available even in holidays.

*Aviation Excess does it right!*
